

BulkBox

The BULKBOX is one of the tippers within the BENALU'S range.

BENALU has been the European leader for Aluminium bulk freight trailers with an unequalled Know-How for tare weight reduction for over 40 years.

The container chassis with swap body

If your activity leads you to make combined rail - road transport, the container chassis with swap body meets your needs.

This vehicle, designed for the bulk goods transport (solid cereals, waste, small scrap) and for pallet transport, is a welded Aluminium ribbed Box. It is available from 20' to 40'.

BENALU 

BulkBox

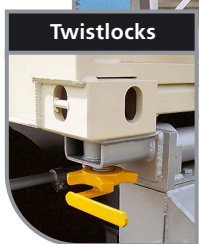

The BULKBOX offers an optimal use: priorities are given to safety, robustness and equipment variety.

Bolted aluminium walkway

Twistlocks

Reinforced floor cross members

TIR Cover sheet system

Cover sheet holder

Reinforced prehension plates

Safety Stability

- **Twistlocks** with locking indicator.
- **Reinforced stability: optimization of the distance between chassis member to 1350mm.**
- **UIC - CSC certification for swap body, maximum gross weight 36T.**

Longevity Robustness

- **Reinforced floor cross members** in length and width for an increased protection.
- **Reinforced prehension plates.**
- **Barn type door with reinforced locking bars.**

Equipment

- **Bolted aluminium walkway** on the bulkhead according to the safety regulation standards required.
- **TIR Cover sheet system** especially studied for the rail-bound transport: resistance to winds reaching 160km.
- **Multifunction straight and curved cover sheet holders** - operated from the ground.
- **Safety device of lights** when tipping.
